BIC Partners

BIC Working group Workshops 21-22nd June 2012 Brussels, Belgium Venue: Diamant Brussels Conference & Business Centre Bd A. Reyerslaan 80 - 1030 Schaerbeek, Brussels

BIC is a Coordination Action Project within the European Commission DG INFSO Unit F5, Trust and Security Jan. 2011—Dec. 2013

http://www.bic-trust.eu

Terms of Reference Day 1
21st June 2012

Background: The European Commission is advocating and supporting strong cooperation internationally, in order:

- To jointly develop ICT solutions to international societal and economic challenges relating to the security and trustworthiness of the global ICT systems, services and infrastructures;
- To jointly respond to major global technological and operational challenges by developing interoperable solutions and standards;
- To improve scientific and technological cooperation for mutual benefit.

At the **1st BIC Annual Forum** in November 2011, a key recommendation was made for enhanced coordination and information-sharing across the variety of bi-lateral International Cooperation (INCO) activities sponsored by the European Commission. As BIC spans multiple countries with a unique multi-lateral profile, BIC aims to further this recommendation by hosting a workshop that brings together the multiple projects and stakeholders that are already engaged in International cooperation with the intent to:

- Explore the insights and common experiences across projects;
- Identifying, discussing and assessing (a) key challenges, issues and priorities; and
  (b) mechanisms for international cooperation that are already available;
- Explore possible synergistic approaches for mutual collaboration, cooperation and organising future joint INCO research activities and its supporting programmes.

Objectives: The Workshop aims to achieve the following concrete outcomes:

- From the experiences and insights of the participants, determine the ways to move forward on international cooperation, and future calls for collaborative research;
- Forming the current bi-lateral (and potentially overlapping) country to country cooperation into a comprehensive and coordinated global cooperation;
- Compiling a *who's who* directory of agency and research contacts across the countries;
- Identification of "success metrics" for international cooperation and collaboration, in terms of:
  - rationale – motives and goals – engagement in international cooperation;
  - success criteria with regard to results;
  - analysis and assessment of INCO impact.

17:00 Day 1 workshop closes

Terms of Reference Day 2
22nd June 2012

Background: While the focus on Day 1 of the workshop will be on the requirements, mechanisms and processes involved in building a long term strategy towards international cooperation in the RTD programme in broader areas than just Trustworthy ICT, the focus on Day 2 will be on the two technical working groups of BIC, specifically dealing with Trustworthy ICT, namely,

1. **WG1. Human oriented /citizen trust, privacy and security**, which will focus on topics related to a multi-disciplinary approach for international cooperation amongst all stakeholders;

2. **WG2. Network Information security / Cybersecurity,** which will focus on topics related to the need for international cooperation for enabling the protection of networks and systems;

Objectives: The Workshop aims to facilitate the WGs in order to:

- Refine thematic focus within the domains covered by the WGs by leveraging domain knowledge, familiarity with context and environment and research experience. Shortlist a set of actionable themes to be taken up in the EU-International joint research context.
- Identify and validate long term common shared research perspectives for international cooperation of mutual interests, aligned with the ICT trust and security research domains within the EU research vision and priorities (FP7 and H2020);
- Represent stakeholder views to be expressed toward the decision makers (the European Commission and the respective Governments for which they carry out research) in the formulation of enabling and relevant policies;
- Provide expert advice to BIC in thematic areas of competence and direct the project consortium to material, publications, activities, projects that might be of interest to BIC, its objectives and actions;
- Assist the BIC project to leverage its actions into achievements within the larger community of stakeholders and institutions. This would include being an advocate for the project and taking part in the organisation of local workshops to broaden the community of participants within their respective countries.

Format: After the opening plenary session, the WG breakout sessions consist of a series of discussions of identified topics for international cooperation in trustworthy ICT each led by nominated person(s) as a topic 'animator(s)'. The animator(s) will open the topic with a short presentation and open the floor to all participants to actively involve themselves within the topic(s) of their expertise.
