

León, October the 30th, 2014

Dear Cybersecurity expert:

The Spanish National Cybersecurity Institute (INCIBE), is an organisation dependent on the Spanish Ministerio de Industria, Energía y Turismo (Ministry for Industry, Energy and Tourism) through SETSI, the Secretaría de Estado de Telecomunicaciones y para la Sociedad de la Información (Secretariat of State for Telecommunications and the Information Society), and is the benchmark institution with regard to the development of cybersecurity, and of digital trust for the general public, for RedIRIS (the Spanish academic and research network), and for businesses, especially sectors of strategic importance.

As a centre of excellence, INCIBE is a service offered by the Spanish Government to work towards the development of cybersecurity as an instrument for social transformation and for developing new fields of innovation. To this end, with its activities focused on research, the provision of services, and cooperation with the relevant actors, INCIBE heads a range of initiatives directed at cybersecurity at both a national and an international level.

INCIBE is now organizing its first edition of **Cybercamp**, which objective is to be the spanish **reference of cybersecurity talent management** for either academic or industrial perspective. It would allow us to enhance our competitiveness based on our most important asset: our professionals.

We count with the collaboration of best national and international experts and we will run multiple cyberchallenges at different levels of complexity as well as we will perform research and development PhD workshops together with entrepreneurial coaching, investors speed dating and jobs forum spaces trying to connect all the different stakeholders for a common goal.

The first edition will be at **Madrid (Casa de Campo, Pabellón Multiusos I)** between **December the 5th and 7th 2014**. The entrance is **free**.

We appreciate you in advance if further dissemination through your channels and contacts could be done, especially **students, teachers, researchers and professionals**, as the pre-qualification on-line phase starts on November 7th and due to the great enthusiasm and effort by the organization and profesional team I represent in order its results could be as of the level of satisfaction everybody could expect from a major event like Cybercamp in present and future.

The registration is already open and free through Cybercamp website: <http://www.cybercamp.es>

Best regards,

D. Miguel Rego Fernández
General Director

SPANISH NATIONAL
CYBERSECURITY INSTITUTE
